Agent Stress Curve (higher = more stress)

Call Quality Curve (higher = better quality)

ACTIONS

- Incoming call notification appears
- Agent reviews caller ID & history
- Agent accepts the call

THOUGHTS

- Who is this caller?
- Do I have context about them?
- Let me be ready

EMOTION

- Neutral
- Alert
- Focused

AI ASSISTANT ROLE

- *Pulls up caller history and account info automatically*

PAIN POINTS

- No prior context on caller
- Multiple systems to check at once

TOUCHPOINTS

- Call platform UI
- CRM panel
- AI assistant panel

ACTIONS

- Agent greets and begins conversation
- Agent listens and responds
- Conversation flows naturally

THOUGHTS

- How do I solve this?
- Am I communicating clearly?
- Is this escalating?

EMOTION

- Engaged
- Pressured
- Attentive

AI ASSISTANT ROLE

- *Listens in real-time, gives subtle tone & pacing feedback*

PAIN POINTS

- Hard to self-monitor tone
- Missing key info mid-call

TOUCHPOINTS

- Live transcript
- Tone indicator
- Suggestion ribbon

ACTIONS - Assistant reviews call opening - Feedback card appears - Agent reads and acknowledges tips	THOUGHTS - Was my greeting good? - Did I sound confident? - What should I change?	EMOTION - Curious - Receptive - Self-aware
AI ASSISTANT ROLE Scores opening on tone, greeting, empathy & pace. Shows quick coaching tips.	PAIN POINTS - Feedback feels disruptive mid-call - Hard to absorb while talking - Risk of over-correcting	TOUCHPOINTS - Opening score card - Feedback overlay - Dismiss button

ACTIONS

- Assistant tracks name frequency
- Warning appears on screen
- Agent adjusts naturally

THOUGHTS

- Am I saying name too much?
- Does it sound natural?
- I should personalise more

EMOTION

- Surprised
- Self-aware
- Adjusting

AI ASSISTANT ROLE

- *Counts name frequency. Alerts on overuse or underuse. Suggests natural insertion points.*

PAIN POINTS

- Unaware of repetition
- Overuse sounds robotic
- Underuse feels impersonal

TOUCHPOINTS

- Name frequency counter
- Warning badge
- Coaching nudge

ACTIONS

- Agent hits Help button
- Types a question to assistant
- Scans suggestions

THOUGHTS

- I don't know this answer
- I need a policy fast
- What should I say?

EMOTION

- Uncertain
- Anxious
- Hopeful

AI ASSISTANT ROLE

- *Detects unanswered questions.*
Surfaces answers, scripts or policy docs proactively.

PAIN POINTS

- Silence feels awkward
- Can't find answer quickly
- Fear of giving wrong info

TOUCHPOINTS

- Help button
- Assistant chat input
- Knowledge base

ACTIONS

- Assistant provides answer
- Agent reads and applies
- Agent continues call

THOUGHTS

- OK, I can use this
- Let me reword naturally
- That was fast

EMOTION

- Relieved
- Confident
- Back in flow

AI ASSISTANT ROLE

- *Delivers concise answers. Flags escalations. Coaches tone with suggested phrasing.*

PAIN POINTS

- Response too verbose
- Suggestion doesn't fit
- Hard to sound natural

TOUCHPOINTS

- Response card
- Copy-to-clipboard
- Escalation flag

ACTIONS

- Agent opens text input panel
- Types question silently
- Sends without interrupting call

THOUGHTS

- I need more detail
- Can't ask out loud
- Let me type quickly

EMOTION

- Focused
- Discreet
- Curious

AI ASSISTANT ROLE

- *Provides silent text channel. Agent can ask privately while call continues.*

PAIN POINTS

- Typing while talking is hard
- Risk of losing focus
- Small input area under pressure

TOUCHPOINTS

- Text input panel
- Chat drawer
- Keyboard shortcut

ACTIONS

- Assistant reads typed question
- Generates concise reply
- Agent reads and applies

THOUGHTS

- That answers it
- I can work with this
- No need to hold customer

EMOTION

- Satisfied
- Confident
- In control

AI ASSISTANT ROLE

- *Replies with short scannable answer.*
Bold key info. Max 3 lines for quick reading.

PAIN POINTS

- Reply too long mid-call
- Answer arrives too slowly
- Agent may miss notification

TOUCHPOINTS

- Text reply bubble
- Bold key info
- Notification badge

ACTIONS

- Agent wraps up call
- Call ends
- Agent reviews post-call summary

THOUGHTS

- Did I handle that well?
- What could I improve?
- How long was that?

EMOTION

- Accomplished
- Reflective
- Ready for next

AI ASSISTANT ROLE

- *Generates call summary, quality score, coaching tips, and auto-fills CRM notes.*

PAIN POINTS

- Manual note-taking slow
- No feedback loop
- Moving fast to next call

TOUCHPOINTS

- Post-call summary
- Quality score card
- CRM auto-fill
- Coaching tips

Design Opportunities & Key Insights

OPPORTUNITY 1

Pre-call Context Loading

Auto-surface caller history and account info before the call connects. Reduces agent ramp-up time and first-impression stress, enabling a more confident and personalised opening.

OPPORTUNITY 2

Real-time Name Usage Coaching

Track customer name frequency during the call and coach the agent with subtle nudges. Prevents both overuse (which sounds robotic) and underuse (which feels impersonal), improving rapport naturally.

OPPORTUNITY 3

Non-disruptive Opening Feedback

Deliver opening feedback as a dismissable overlay rather than a blocking element. Agents should be able to absorb tips at their own pace without losing conversational flow.

OPPORTUNITY 4

Silent Text Channel

Provide a keyboard-shortcut-accessible text input for agents to ask questions discreetly mid-call. Reply format must be scannable in under 3 seconds — bold key info, max 3 lines.

OPPORTUNITY 5

Proactive Answer Surfacing

Rather than waiting for the agent to hit 'Help', the assistant should detect unanswered customer questions from the transcript and proactively push relevant answers or policy snippets.

OPPORTUNITY 6

Post-call Coaching Loop

Generate a quality score with timestamped moments for coaching. Auto-fill CRM notes to save wrap-up time and allow agents to move to the next call with a clear improvement focus.
